Vacuuming carpets?

You can vacuum carpets after 48 hours, and as often as you like thereafter.

What if pets bring fleas into the home?

The fleas that your pet carries into the home will remain on the pet until they are killed either by your pet's grooming itself or by the use of the on-the-pet products your pet professional has dispensed to you. The eggs that are laid by the female fleas will roll off into your carpets, and they and any larval forms present will be destroyed by our powder.

Have yard sprayed?

That is your option. But, it is impossible to control the outside. The home environment is protected with the one year, money-back guaranteed Fleabusters® Rx For Fleas® Method. But please give us a call about our outdoor treatment.

How long does it take to apply Fleabusters® Rx For Fleas® Plus powder?

An average home takes between one and two hours to treat, depending on the size of your home.

Must you leave the home during treatment?

In most applications, no one needs to evacuate the home. There are rare exceptions.

Guarantee?

Written one year money-back guarantee (Void only if your carpets are shampooed, cleaned or removed).

Treatment of pet?

Fleabusters® Rx For Fleas® is for the home environment. You and your veterinarian should determine what is best for your pet.

How do fleas affect the well-being of your pet?

Fleas carry the intermediate form of tapeworm and can infect your pet. More importantly, many pets are highly allergic to flea bites and can develop a serious skin reaction and infection that requires veterinary care.

Will the powder harm our carpet?

No. The Fleabusters Rx For Fleas Plus powder is non-acidic, non corrosive and has a neutral pH balance and will not harm even the finest carpets or area rugs.

Odorless?

Yes. The Fleabusters® Rx For Fleas® Plus powder is odorless and will deodorize your carpets.

How long before we see results?

Anywhere from two to five weeks, depending upon the degree of flea infestation in you home.

Price?

Price is based on the size and number of treatable areas in your home.
